Table 2. Schedule A Commodity by Country of Origin, Customs, F.a.s., and C.i.f. Values—Continued

(See "Explanation of Statistics" for information on coverage, date of importation, definitions of Customs f.a.s. and c.i.f. values, sources of error in the data, OTH CTY (other countries), and other definitions and features of the import statistics. Shipments valued less than $251 are shown only under Schedule A commodity number 990.00.00 and excluded from all other commodities.)

Schedule A commodity number, description and unit of quantity:

Country of origin	Current month				Cumulative January to date			
	Net quantity	Value (dollars)			Net quantity	Value (dollars)		
		Customs	f.a.s.	c.i.f.		Customs	f.a.s.	c.i.f.

Emanuel A. Lipscomb, Chief

U.S. import statistics are compiled from information verified by Customs Import Specialists on import entries filed with Customs by importers. Under the direction of Robert E. Chasen, Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to field offices under the technical direction of the Duty Assessment Division.

Explanation of Statistics

COVERAGE

The import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. Customs territory (includes the 50 States, the District of Columbia, and Puerto Rico), without regard to whether or not a commercial transaction is involved. In general, the statistics record the physical movement of merchandise into the United States from foreign countries, with the exception of the following types of transactions which are excluded from the statistics:

1. Merchandise shipped in transit through the United States, when documented with customs as an intransit movement.
2. Shipments between the United States and Puerto Rico, between the United States and the Virgin Islands, Guam, American Samoa, and other U.S. possessions, between any of these outlying areas, and imports into U.S. possessions from foreign countries. (Imports into Puerto Rico from foreign countries are included in the U.S. import statistics. Statistics on U.S. trade with Puerto Rico and with U.S. possessions are published separately in report FT 800. Additional data on such trade and on trade of the Virgin Islands with foreign countries are presented in reference tabulations.)
3. U.S. merchandise returned by U.S. Armed Forces for their own use.
4. Issued monetary coins of all component metals.
5. Some other transactions not considered to be of statistical significance, such as personal and household effects of travelers, temporary imports, and low-valued nondutiable imports by mail.

INCLUSION OF GOLD IN THE STATISTICS

Effective with the statistics for January 1978, imports of nonmonetary gold (in such forms as ore, scrap and base bullion, nonmonetary refined bullion, etc.) which were previously excluded, are now included in the statistics. Imports of silver in these forms have been included since January 1969. For additional information regarding the inclusion of gold in the 1978 statistics, see the Special Announcement in the January 1978 issue of this report.

GENERAL IMPORTS/IMPORTS FOR CONSUMPTION

Imported merchandise is reported as "General Imports" and "Imports for Consumption." General imports (shown in this report) are a combination of entries for immediate consumption and entries into Customs bonded warehouses. With certain exceptions as indicated above, these data generally reflect total arrivals of merchandise, whether such merchandise enters consumption channels immediately or is entered into warehouses under Customs custody to be subsequently withdrawn for consumption or withdrawn for exportation. The general import statistics, therefore, reflect merchandise entered for immediate consumption ("duty free" merchandise, merchandise on which duty is paid on arrival, and merchandise entered into Customs bonded manufacturing warehouses for processing and subsequent export of the main product) plus merchandise entered into Customs bonded storage warehouses and Customs bonded smelting and refining warehouses.

Imports for consumption (not shown in this report) are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. With certain exceptions as indicated above, these data generally reflect the total of commodities entered into U.S. consumption channels. Data on imports for consumption are presented in tabulations which are available for reference purposes. (See the section on Sources of Further Information About Foreign Trade Statistics.)

SOURCE OF INFORMATION

The official U.S. import statistics are compiled by the Bureau of the Census from copies of the import entry and warehouse withdrawal forms, which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by Customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for Customs appraisement. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

DATE OF IMPORTATION AND IMPORT MONTHLY CARRYOVER

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation (or the month of withdrawal in the case of warehouse withdrawals for consumption). Effective with the January 1978 statistics, the date of importation as reported on the import entries is being used to determine the statistical month. (Prior to 1978, the date of Customs official acceptance of the import entry documents was used to determine the statistical month in which the shipments were included.) However, since under the Customs "immediate-delivery" procedures importers may file the import entry up to 10 workdays after the date of release of the merchandise, some documents for merchandise imported during the last few days of a given month may not be received in time for inclusion in

the statistics for that month. As a result, there is a carryover, estimated at about 15 percent, from the actual month of importation to a subsequent month. In addition, processing problems (e.g., late filing of documents, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.) contribute to an additional carryover of about 5 percent (in terms of value) of shipments from the reported month of importation (or withdrawal from warehouse) to a subsequent month, usually the succeeding month. These limitations should be borne in mind when making month to month comparisons.

Cumulations of data over at least 4-month periods are desirable to identify underlying trends. Month-to-month changes in imports, exports, and similar series often reflect primarily irregular movements, e.g., exogenous events such as strikes, differences in monthly carryover.

IMPORT VALUATION

Customs Import Value

The value of imports as appraised by the U.S. Customs Service in accordance with the legal requirements of Sections 402 and 402a of the Tariff Act of 1930, as amended, is referred to as the Customs value. It may be based on the foreign market value, export value, constructed value, American selling price, etc. It generally represents a value in the foreign country and therefore excludes U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States. This valuation is primarily used for collection of import duties and frequently does not reflect the actual transaction value.

In those instances where assistance was furnished to a foreign manufacturer for use in producing an article which is imported into the United States, the value of the assistance is required to be included in the Customs value reported for the merchandise. Such "assists" include both tangible and intangible assistance, such as, machinery, tools, dies and molds, blue prints, copyrights, research and development, and engineering and consulting services, etc. Therefore, unit values for some imports, if derived by using the Customs value, may be substantially increased due to the inclusion of such "assists."

FAS Import Value

The f.a.s. value represents the transaction value of imports at the foreign port of exportation. It is based on the purchase price, i.e., the actual transaction value, and generally includes all charges incurred in placing the merchandise alongside the carrier at the port of exportation in the country of exportation.

CIF Import Value

The c.i.f. value represents the value of imports at the first port of entry in the United States. It is based on the purchase price and includes all freight, insurance, and other charges (excluding U.S. import duties) incurred in bringing the merchandise from the country of exportation and generally placing it alongside the carrier at the first port of entry in the United States. If the merchandise was acquired in a transaction between related parties, the purchase price used in deriving the c.i.f. value is based on an arm's-length equivalent transaction price, i.e., a price which would exist between unrelated buyers and sellers.

COMMODITY INFORMATION

The basic import data are initially compiled in terms of the commodity classifications in the Tariff Schedules of the United States Annotated (TSUSA), which is an official publication of the U.S. International Trade Commission embracing the legal text of the Tariff Schedules of the United States together with statistical annotations.

In this report, the TSUSA data are presented in terms of a rearranged commodity classification system—Schedule A, SITC Based Classification of Commodities Imported Into the United States, which is based upon the Standard International Trade Classification (SITC), Revision 2,[1] effective with statistics for January 1978. (Prior to January 1978 Schedule A was based upon the former SITC, Revised.) Schedule A was constructed by the Bureau of the Census (1) to provide for the summarization of data for the approximately 10,000 TSUSA classifications into about 3,000 commodity groupings that are meaningful in terms of commodities important in the U.S. import trade, and (2) to provide data in terms of the SITC outline that are comparable, insofar as comparison is possible, to the foreign trade statistics compiled by other trading nations.

The numbering system of Schedule A is basically the same as the SITC. Whenever Schedule A one-, two-, or three-digit numbers are the same as those in the SITC, it is believed that for most statistical purposes the commodity coverage can be considered essentially comparable, although the coverage is not always identical. Reasonable comparability for statistical purposes can also be expected, in most cases, when five-digit Schedule A numbers are identical with SITC numbers. At the four-digit level, the retention of an SITC number in Schedule A indicates similarity of coverage but the degree of comparability may, in some cases be less at the four-digit level for identical numbers in the two systems than at the five-digit level. When a non-SITC number is used as the third, fourth, or fifth digit of a Schedule A number, comparability of coverage with any given SITC classification at the same level ordinarily does not exist, but there usually will be comparability involving combinations of the affected Schedule A or SITC classifications.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

[1] United Nations Statistical Papers, Series M, No. 34/Rev. 2

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. The data in this report are presented in terms of the first three digits of the four-digit numeric codes in Schedule C-I. Countries are listed in sequence within continents generally from north to south and west to east. Country names that are abbreviated in this report to save space are shown in full in Schedule C-I. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

For individual Schedule A commodity classifications, information for each country of origin is shown only where imports of the commodity from the country average $5,000 or more per month, on a cumulative year-to-date f.a.s. value basis. The designation OTH CTY represents the total for countries from which imports of the particular commodity averaged less than $5,000. The country designation UNIDENT is used to reflect imports from countries which could not be identified because of illegible reporting on import entries for low-valued shipments.

ESTIMATED DATA FOR LOW-VALUED IMPORTS

The import statistics include estimated data for shipments valued under $251 reported on both formal and informal entries. (Informal entries generally contain items valued not more than $250). The estimates are based on a 1-percent sample following standard practice. The estimates for shipments valued under $251 are shown under commodity codes 9900000, 990.0, 990, and 99 and are included in the section 9 total and the total for U.S. imports. They are excluded from the other two-, three-, four-, and seven-digit commodity codes. The estimates for low-valued shipments do not reflect any imports by mail of duty-free merchandise valued under $251, for which import entries are not required to be filed.

The statistics for commodity codes from which the low-valued shipments are excluded are undercounted to the extent that such low-valued shipments of the particular commodity are made. The total value so excluded generally amounts to less than 1 percent of the monthly import total. Although subject to considerable variability, particularly when the estimated amounts are relatively small, these estimates for low-valued imports may be of some interest as a rough guide to the general magnitude of the effect that the exclusion of the items has on the commodity data for individual countries.

The extent to which the estimates shown under commodity code 9900000 might not agree with a complete tabulation of the shipments depends upon the number of items that fall in the sample. In table 2, which contains seven-digit commodity-by-country data, the number of items in the sample is shown by country under commodity code 9900000 in the net quantity columns. The number in sample can be used in conjunction with the table, shown in the column to the right, to obtain an approximate estimate of the sampling variability on a 2-times-out-of-3 basis.

If the number of items indicated from the sample is—	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between—	
	The specified estimate reduced by[1] —	And the specified estimate increased by—
0	0	28,060
1	11,000	35,000
2	17,000	40,500

28	73,800	92,600
29	75,100	93,800
30-34	78,750	98,100
35-39	84,000	105,750
40-49	92,400	116,800
50-59	103,500	129,750
60-69	113,800	140,500
70-79	121,700	149.700
80-89	130,500	158,200
90-99	137,250	165,400
100-124	148,300	175,500
125-149	162,000	187,600
150-174	176,100	199,000
175-199	187,000	211,000
200-249	212,800	229,500
250-299	236,000	252,000
300-399	269,500	285,000
400-499	308,500	325,500
500-699[2]	344,000	359,000

[1] The actual value of shipments cannot be less than 1/100 of the estimated amount shown in the report. Figures in this column can be ignored if use of them for a particular total would bring the lower limit below 1/100 of the estimate.

[2] If the number of items in the sample is greater than 699, sampling variability for the estimates of the low-valued shipments will generally be less than 9 percent.

The following will illustrate the use of the table

Suppose an estimated value of $310,800 is based on 45 items in the sample. Referring to the line 40-49, one notes the values $92,400 and $116,800. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $218,400 ($310,800 reduced by $92,400) and $427,600 ($310,800 increased by $116,800). Should a user desire to combine two or more figures that are estimated values or include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

SOURCES OF ERROR IN THE STATISTICS

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, net quantity, value and other statistical factors, month of inclusion (see the preceding explanation regarding Date of Importation and Import Monthly Carryover), and errors which may result from the sampling of shipments valued under $251. (See the explanation regarding Estimated Data for Low Valued Imports.) As indicated under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by Customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for Customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

REVISIONS TO THE STATISTICS

Under the revision policy adopted effective with the 1977 statistics, revisions to the statistics will be made once a year. Revisions will be issued with the June reports, showing corrections to the monthly statistics for the prior year. Therefore, revisions to the 1979 statistics will be released with the June 1980 reports. This is a change from the policy previously in effect under which corrections to data for the prior year were issued with the June statistics, while revisions to monthly statistics for the current year (generally encompassing corrections for the first three quarters of the year) were released with the December statistics.

SOURCES OF FURTHER INFORMATION ABOUT FOREIGN TRADE STATISTICS

Summary statistics for both exports and imports are published in report FT900, Summary of U.S. Export and Import Merchandise Trade, and report FT 990, Highlights of U.S. Export and Import Trade. More detailed data are available in reference tabulations (see below). Information regarding additional sources of foreign trade data is furnished in the Guide to Foreign Trade Statistics. The Guide contains an explanation of the coverage of the statistics and provides sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports and tabulations.

Supplementary information and explanations of interest to users of foreign trade statistics (such as notices of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, and changes in statistical procedures) are included as special announcements in current issues of the statistical publications. Reports providing additional detail compiled but not published may be obtained on a cost basis.

Copies of foreign trade reports and tabulations are available for public reference use at the reference locations listed below, at various other Department of Commerce field offices, and at some U.S. Customs Service offices. Since the distribution of foreign trade material varies among offices, inquiries regarding the availability of particular types of data should be made at individual offices or directed to the Bureau of the Census, Washington, D.C. 20233.

Some of the principal reference locations for foreign trade statistics are:

Trade Information Branch
Foreign Trade Division, Bureau of the Census
Room 2231, Federal Office Building #3
Washington, D.C. 20233
(Located at Suitland, Md.)

U.S. Trade Reference Room
Industry and Trade Administration
Room 2314, Commerce Building
Washington, D.C. 20230

Department of Commerce Field Office
37th Floor, Federal Office Building
26 Federal Plaza, Foley Square
New York, N.Y. 10007

Department of Commerce Field Office
11777 San Vincente Boulevard
Los Angeles, Calif. 90049

Department of Commerce Field Office
Federal Building, P.O. Box 36013
450 Golden Gate Avenue
San Francisco, Calif. 94102

Department of Commerce Field Office
Room 432, International Trade Mart
Number 2 Canal Street
New Orleans, La. 70130

Table 2. Schedule A Commodity by Country of Origin, Customs, F.a.s., and C.i.f. Values—Continued

Note: Explanation of Statistics for information on coverage, rate of importation, definitions of Customs, f.a.s., and c.i.f. values, sources of country data, OTH CTY (other countries), and other definitions and features of the report is contained in the introduction. Statistical breakdowns below which values less than $251 are shown only under Schedule A commodity number 9900000 and excluded from all other commodities.
